- > According to existing legalization in Russia and another former USSR countries, imported alcohol at the moment of border crossing must be already labeled with excise stamps.
- > Excise marks labelling means 3 main operations :
  - > Stickering of marks themselves
  - > Stickering of back labels
  - > Transport box, pallets and whole load excise marks interval registration in EGAIS system
  - > For beverages from out of EU general (transit) warrantee is needed.

- > EGAIS – State electronic excise goods tracking service
  - > Aim of system are on-line control over all alcohol flow from border till retail.
  - > Main reason of such system – prevention of counterfeiting of excise marks, smuggling of alcohol and falsifying of brands.
- > Each importer must be registered in this system and each mark have owner.
- > This information must be sent as \*csv file to state authority before cargo cross Russia border.
- > EX3;TIR, T1, CMR documentation.

Thanks to **market know-how and established operational setup in** CEVA Logistics Latvia can provide excise goods services for Russia, Belarus, Central Asia, Ukraine and Caucasus transit.
