

MULTIMODAL via BALTIC HUB

Dedicated MULTIMODAL solutions - RAIL

Being located in favorable geographical location, CEVA Logistics Latvia provides different dedicated multimodal solutions for general cargo deliveries from EU and non-EU factories to CIS/1520 rail gauge area. Whether it is sea (deep sea, short see, Ro-Ro), rail or road transportation, CEVA Logistics Latvia team of experts will handle the delivery in the best and safest way, offering individual approach to every customer, applying the most effective and reliable price.

- > Different possibilities for **direct delivery** in containers
- > Support with **customs management** (cross-trade operations, temporary import and export processes)
- > **Containers lot management:** just-in-time and sequenced loading and delivery
- > **Long storage** possibilities in **Advanced HUB in Riga** with **fastest** possible delivery terms for **on-carriage**
- > Possibility to **optimize delivery costs** by **consolidating** volume of several containers / trucks in one conventional wagon
- > **Effective** for volumetric cargo
- > **One point contact** for the whole delivery chain
- > Possibility to arrange **independent survey** representative at **transshipment place**

Thanks to **market know-how** and **reliable operational setup in Baltic HUB**, CEVA Logistics Latvia can ensure efficient door-door transportation to the whole CIS/1520 railway gauge area using railroad as last leg delivery with the possibility for door delivery at destination.
